Column 3,

Between lines 16 and 17, please add the following:

-- The glass provided with SPD films is typically designed as laminated safety glass, the SPD film being layered in the middle between two panes of silicate glass. However, it is also possible to provide the film on the inside or outside of single-layer glass, preferably safety glass. In this configuration, another film or coating is suitable for protecting against mechanical damage, for example weathering effects. --.
